

NexNova - Nex's Web Browser

Latest stable version: v50

Latest beta version: v60

Description:

NexNova is Nex's official web browser, fully integrated with the Blyx engine. It offers fast navigation, customizable tabs, privacy options, and complete WebView2 support. Future versions will introduce new systems for feedback, downloads, security, and NexAI integration, leading to a complete browsing experience under the Nex ecosystem.

Future versions

v50 (current)

- Tab system
- History and configuration
- Help panel
- Menu with various options (History, Settings, New Tab, etc)
- Private tabs
- Favorites
